

BAKERE PUBLIK!

In 2014, I became interested in the science of making puff pastry. Travelling around the world, I learned the tricks from great masters (Bedros Kabraninan, Dominique Ansel), then developed my own recipe and started running my own workshop in Nigeria. After the experience gained in a distant country, we started the domestic manufactory in 2019, which became Pékköz-társaság. To this day, it amazes me that the dough and the butter almost have a soul, how much patience and attention is needed for the perfect product. To this day, our colleagues and I make everything by hand. Careful hands make sure that our puff pastry with the most beautiful layers gives the most delicious experience.

Master BAKER MÁRIUSZ FODOR,

BAKERE PUBLIK!

4

The Pékköztársaság (Republic of Bakers) is a project of love, the goal of which is to bring additive-free baked products made from quality ingredients to the customers' tables.

Our pastries are made from puff pastry using artisan technology and are packaged frozen, ready to bake. The French butter used for folding gives them a pleasantly characteristic taste, well harmonized with the dominant filling materials, which are also selected from among the finest after careful experimentation.

Keeping the unmissable classics on our constantly expanding product range, they give space to their soaring imagination, and list innovative products.
